Attention: Ryan C. Fisher
Deputy General Counsel and Assistant Secretary
Ingevity
Ryan—

This is a follow up to our telephone conversation of yesterday.

You have asked that the below information related to a formulation and the mass spectroscopy data output (the mass spectrum) of the product be treated as confidential business information (CBI). Persons in Ingevity had caused this information to be directed to EPA last week with an understanding that this information would be protected as CBI.

EPA agrees to protect your information claimed as CBI, subject to disclosure only as authorized under applicable statutes and consistent with the procedures set forth in Agency regulations (e.g. 40 CFR part 2). Procedurally the Agency will only allow access of the materials containing information claimed as CBI by Federal employees and contractor staff who have a need for access to this material to perform their assigned tasks. We do understand that similar information has been forwarded to state authorities.

Subject: Indulin AA-86/CBI Information

Scott,

Thank you for taking the time to speak with me today. Feel free to call me to discuss further.

The information we would like to keep confidential (as CBI) is:

-CAS Registry Number

-EC No.

-EINECS No.

-CAS Inventory Names

- The mass spectroscopy data output (the mass spectrum) of the product.

The detail for all of this has been previously provided to the EPA. I can provide the information again if you need it.

Let us know what else we can do to assist. Thank you

Regards,

Ryan

Ryan C. Fisher
